VALIDATION CRITERIA CHECK		
Validation Flags Applicable to this Review: U The analyte was analyzed for, but not detected above the reported sample quantitation limit. J The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample. J+ Result is estimated quantity but the result may be biased high. J- Result is estimated quantity but the result may be biased low. UJ The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample. NJ The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration. B The analyte was detected in the method, field, and/or trip blank. R The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.		
1. Were all the analyses requested for the samples submitted with each COC completed by the lab?	Yes X	No

Comments:			
2.	Did the laboratory identify any non-conformances related to the analytical result?	Yes	No X
Comments: No non-conformances.			
3.	Were sample Chain-of-Custody forms complete?	Yes X	No
Comments:			
4.	Were samples received in good condition and at the appropriate temperature?	Yes X	No
Comments: Based on the laboratory sample receipt form, the samples were received by the laboratory without custody seals.			
5.	Were sample holding times met?	Yes X	No
Comments:			
6.	Were correct concentration units reported?	Yes X	No
Comments:			
7.	Were detections found in laboratory blank samples?	Yes	No X
Comments:			
8.	Were detections found in field blank, equipment rinse blank, and/or trip blank samples?	NA X	Yes No
Comments: No field blanks were submitted with this sample delivery group.			
9.	Were instrument calibrations within method criteria?	NA X	Yes No
Comments: Not Applicable, Level II data validation.			
10.	Were surrogate recoveries within control limits?	Yes	No X

Comments: PCBs: Recoveries of the surrogate decachlorobiphenyl (DCB) were less than the Delaware Department of Natural Resources (DNREC) Standard Operating Procedures for Chemical Analytical Programs Under the Hazardous Substances Cleanup Act (SOPCAP, Feb. 26, 2015) control limits in samples C-3(0.0-0.3) (56%) and C-3(0.5-0.8) (51%). PCBs were not detected in these samples and were qualified UJ (estimated reporting limit). Reason code: SUR			
11. Were laboratory control sample(s) (LCS/LCSD) sample recoveries within control limits?		Yes X	No
Comments:			
12. Were matrix spike (MS/MSD) recoveries within control limits?	NA X	Yes	No
Comments: Not applicable; site-specific MS/MSD not analyzed for this sample delivery group (SDG).			
13. Were RPDs within control limits?		Yes X	No
Comments:			
14. Were dilutions required on any samples?		Yes X	No
Comments: PCBs: Two soil samples required dilution prior to analysis, dilution factor for both at 5X. Sample reporting limits were adjusted accordingly. No data were qualified.			
15. Were Tentatively Identified Compounds (TIC) present?	NA X	Yes	No
Comments: TIC not requested.			
16. Were organic system performance criteria met?	NA X	Yes	No
Comments: Not Applicable, Level II data validation.			
17. Were GC/MS internal standards within method criteria?	NA X	Yes	No
Comments: Not Applicable, Level II data validation.			
18. Were inorganic system performance criteria met?	NA X	Yes	No
Comments:			
19. Were blind field duplicates collected? If so, discuss the precision (RPD) of the results.		Yes	No X

Comments: No blind field duplicates were submitted with this SDG. The lack of a field duplicate did not affect data quality, usability, or completeness. Completeness with regard to collection of the required number of field duplicates will be assessed on an overall program-wide basis.			
20. Were at least 10 percent of the hard copy results compared to the Electronic Data Deliverable Results?	Yes X	No	Initials KEF
Comments:			
21. Other?		Yes	No X
